

# COMMUNI-TREES PLANTING MAP

This map shows where residents have planted trees through our Communi-trees program since 2022 (●) and the relative **Tree Equity Scores** for Shoreline. Environmental, demographic, and health data (e.g., existing tree canopy, income, surface temperature) for each census block are combined into a single score between 0 and 100. A score of 100 means that a neighborhood has achieved Tree Equity. These scores are also visually translated onto the map—the greener an area, the higher its Tree Equity Score. Our goal is to get more trees planted in the areas that need them most—the orange areas.
