

North Corridor Transit Project

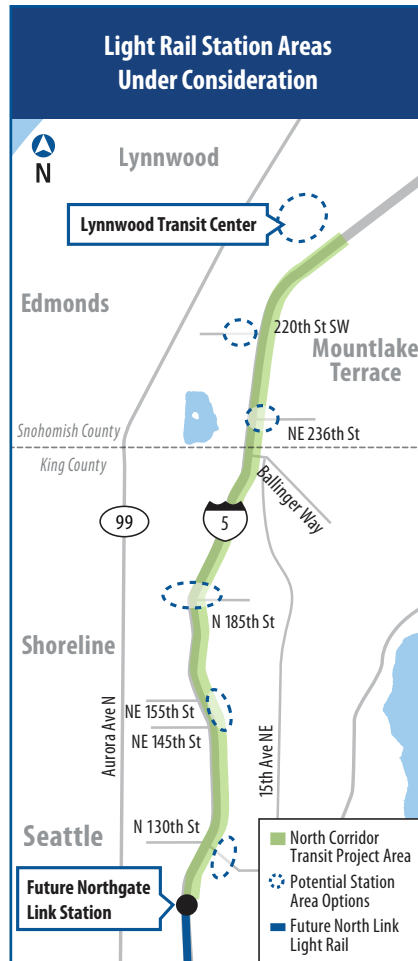

Sound Transit has been studying potential light rail routes and stations between Northgate and Lynnwood along Interstate 5 based on results of environmental scoping and community input received last summer and fall.

Recently the Sound Transit Board of Directors took a major step toward expanding mass transit to Lynnwood by confirming that light rail is the best mode of transit and I-5 is the right corridor to study based on ridership, travel times, service levels and cost.

Drop in to learn where the light rail route could be located along I-5, see where stations are being considered and ask questions of project staff.

For more information, email northcorridor@soundtransit.org or call Roger Iwata, Community Outreach Corridor Lead, at 206-689-4904.

Let's have a chat!

Drop in and talk to staff, learn more and provide your feedback:

SEATTLE
