

## **KOREAN COMMUNITY MEETING – July 11, 2013**

### **TRANSPORTATION AND MOBILITY COMMENTS SUBMITTED:**

#### **General Comments / Transportation and Mobility**

1. Bicycle storage that is safe and secure
2. Enough parking spaces particularly for commuters
3. Accommodation for elders and people with disabilities
4. Expanded bus service to connect the community to the station, especially East-West, but also between King and Snohomish
5. Bicycle lanes that connect the community to the station
6. Able to get to the station by walking or biking
7. Circulating shuttles picking up people to take them to the station so they wouldn't have to bring their car; stopping at shops, the library and other popular destinations along the way
8. Places to visit by foot that are near the station where people can shop, fitness center, grab coffee or a snack

#### **Questionnaire: How are you most likely to access light rail stations?**

No Comments Submitted

#### **Questionnaire: What would make you more likely to bus, bike, or walk there? What improvements would make you feel safe doing so?**

No Comments Submitted

#### **Questionnaire: What other features should be incorporated into pedestrian or bike infrastructure to make them more attractive and functional?**

No Comments Submitted

#### **Questionnaire: What is the best strategy for managing parking near station areas: structured parking garage, surface parking lot, on-street parking, discouraging people from driving to stations, or other ideas?**

No Comments Submitted

**Questionnaire: What are your concerns with regard to transportation and mobility within station areas?**

No Comments Submitted

**Questionnaire: What should be the City's goals with regard to transportation and mobility within station areas?**
