Council –

The attached letter from Peter Eglick’s office on behalf of the Innis Arden Board suggests a relatively minor addition to page 15 (in I-Legislate this is 7d-25 – part of #4). Dick, Ian and I have reviewed and we support the recommendation except that we would remove “legally protected” from their recommendation. If Council would like to make this amendment, Ian believes it is minor enough to do so administratively and Council could reference the amendment in adoption of the Consent Calendar. The other option is to pull this off of the consent agenda if you would like to have a brief discussion. Here is the proposed resulting language with the new addition underlined:

Strategies for species suitability and diversity –

- Updated Tree List – section for unimproved ROW, natural areas, open spaces and section for improved ROW – include detailed information on growth, space limitations, maintenance issues, views
- Enforce compliance with development to put right tree in right place.
- Use list for new plantings, not as an approved list for existing trees in the ROW, and recognize that listed species may not be appropriate in some circumstances (for example, where they interfere with infrastructure and views).

Please let me know your thoughts.

RE: Draft *Urban Forest Strategic Plan*: Wording Clarification

Dear Mayor and Members of the Council:

The Innis Arden Club appreciates the acknowledgements concerning the Urban Forest Strategic Plan (UFSP) that the City's intent is to limit street tree approval to "site appropriate" trees. What remains is to reaffirm that in Plan language. This can be readily accomplished by the following refinement to the Plan wording now before you for adoption (proposed added language is underlined):

May 19, 2014 Draft Plan at page 15:

Strategies for species suitability and diversity –

- Updated Tree List – section for unimproved ROW, natural areas, open spaces and section for improved ROW – include detailed information on growth, space limitations, maintenance issues, legally protected views.
- Enforce compliance with development to put right tree in right place.
- Use list for new plantings, not as an approved list for existing trees in the ROW, and recognize that listed species may not be appropriate in some circumstances (for example, where they interfere with infrastructure or legally protected views).

EGLICK KIKER WHITED PLLC

May 19, 2014

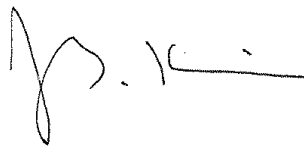

Page 2 of 2

These refinements will clarify -- in the Plan itself -- the stated intention that deference will be afforded existing view covenants such as the Club's, when "site appropriateness" determinations are made regarding street trees.

Thank you for your consideration of the foregoing.

Sincerely,

EGLICK KIKER WHITED PLLC
