7. After reading the 360 some pages for Monday nights meeting one thing that made me wonder is how do to you purpose for the North City Water District to upgrade the pipes and add additional pump stations to the 185th & 145th. Rezones. Are we to up our rates to our existing rate payers and burden them with the expense for the future developers?

I thought the Growth Management Act stated that growth pays for growth not the current residents.

When projects have occurred in our District in the past few years we have worked out agreements to partner with the developers and save our ratepayers and the developers the full costs of those projects for a win win situation. This could be a plan with any future development rather than expecting our ratepayers and your taxpayers to bare the whole cost before that hoped for development happens.

Thank you,  
**City of Shoreline**
