Subject: Comp Plan Docket item 1
Date: Monday, June 15, 2015 9:04:52 AM

It is not too late to do the right thing, not what is easiest, least intimidating, or what seems like is in the best interest of "the city".

Let's be clear. The City of Shoreline only exists because of it's schools and the schools are strong due to the long continued support of it's residents. A by product of the schools (since 1960) are the lovely neighborhood communities that have existed long before the City of Shoreline came to be, and people feel tied to this area because of them.

Let's also be clear on another point. It's *YOUR* vision for Shoreline that includes an urban quality, high density, and a raging business corridor not *OURS*. It's time to get serious about the impact that (all) the decisions before you will have on our neighborhoods, the neighbors they are comprised of, and the schools that anchor it all. Do not be the council that becomes memorable for the beginning of the end of our wonderful city of communities. If the quality of life is diminished here, so the will rest follow.

The whole is only as good as the sum of it's parts and you were elected to represent the sum of City's parts to manage the "whole", not recreate the city and fit the parts in it. Please approve docket item 1 for further study and direct City staff to study setting a v/c ratio limit on collector arterials. Thank you.
