To:council@shorelinewa.gov

As you are aware, we in Richmond Beach have been concerned about the proposal to add a very large number of dwelling and commercial units at Point Wells, part of Snohomish County, but with a narrow access through Richmond Beach to the outside world. The problem of having a secondary access or egress road also aggravates those concerns, as it affects traffic congestion, noise, safety, and overall quality of life in Richmond Beach and beyond.

We therefore ask the Shoreline City Council to approve docket item 1 for further study and direct City staff to study setting a v/c ratio limit on collector arterials, to include the foregoing items mentioned, as well as the anticipated environmental impacts.

Thank you!
