Most of us, even though we are not "urban planners" know that traffic impacts neighborhoods. If our children, our elderly, our infirmed and our healthy citizens cannot cross a neighborhood road without risk to life and limb due to increased traffic, we as a community suffer. We lose Social Capital.....and that is difficult to regain!

Traffic is not just an engineering issue. If you listen or attend any of our city council meetings, you will hear the discussion of traffic management as a dry matter of fact, car counting happenstance that small changes like altering timing of lights, turn lanes and those ugly misplaced "traffic calming devices" offered as solutions to problems.

Much BIGGER problems lay ahead! What is happening in one area of Shoreline affects all of Shoreline.

I support the continued involvement of our citizens in holding the city leadership and decision makers accountable to exercise thoughtful and thorough assessments before considering proposals that affect us all!

Let the sunshine in.....make thoughtful, informed transparent decision.....Thank you SRB and my

fellow citizens who have stayed involved and informed....it takes a lot of commitment to do what you do and we all benefit!

Thank you,
City of Shoreline
