I am a tax payer in Shoreline with multiple properties and I was born and raised here.

This plan to let homeowners allow essentially "tent cities" in their yards is a horrible idea. It will create issues in the neighborhoods, it is a huge liability for the homeowner (and neighborhoods), it isn't addressing the homeless issues at all and it will dramatically reduce the property values in Shoreline as well.

Do not follow what Portland or even Seattle have done - they haven't worked there, so why try it in our fabulous, family oriented city??

We already host official Tent Cities in Shoreline and there are many options that homeless people are not even taking advantage of. Please do not be short sighted in your decision - this is not a good idea.
