Subject: homeless encampments on private property
Auto forwarded by a Rule

Greetings Shoreline Planning Commission.

If the suggestion to allow private residents to host homeless encampments in their backyards is mere concept and not a serious proposal, please ignore this message.

Otherwise, wow! The health, safety and liability issues for both the City and homeowner “hosts” would be huge. The vast majority of homeless are clean, sober and desire nothing more than an opportunity to get back on their feet. The challenge will always be protecting society from the few exceptions – the addicted, the criminal, the predator – and this simply can’t be left to well-intentioned private citizens, even those who threaten to sue for the right to do so.
