7. While I believe it is always a good idea to take care of creation, it also should be done with good stewardship. As you proceed with this discussion please look at the cost versus benefit. We like to talk a lot about climate change and use it as an excuse to spend tax payers money when the actual benefit received is so small that it makes almost no difference.

Please remember there are other needs that should be addressed and we need to prioritize what is most important and will give the most impact to our community. As an example, spending a lot more money on an incredibly "green" building may make a miniscule difference in the long run but does not help other needs now.
8. Not answered

Thank you,
City of Shoreline
