Q6 You answered "yes" to having concerns with stormwater services such as drains, ditches or outfalls, being properly maintained in your area. Please describe your concern below:

Answered: 78 Skipped: 93

#	Responses	Date
1	Specifically the on and off ramps for I-5 and 175th. There has been flooding here multiple times in the last year, coming close to swamping lower-clearance cars.	9/15/2016 3:17 PM
2	Cromwell Park is an eyesore and now we have Mosquitos that we did not have before the retention pond.	9/15/2016 10:36 AM
3	We had an 8' deep sink hole develop right next to our house a few years ago. There is a large storm drain that runs there. A 1963 pipe failed during a big November rain. It runs down a steep hill from there. If a pipe up top failed, I worry about the condition of the rest of the line.	9/14/2016 11:07 PM
4	Keeping drains clear, and making sure ditches are clear of debris	9/14/2016 8:49 PM
5	Flooding usually near the corner of 1st and 179th after a rainfall.	9/14/2016 4:01 PM
6	The city has told me it only maintains the ditch once every two years. Neighbor blows needles and other debris into the ditch (though he denies it), which can cause clogging.	9/14/2016 3:23 PM
7	When there is a heavy downpour, part of my street floods. Additionally, there is always debris clogging the drains on Fremont, causing standing water during heavy rains	9/13/2016 8:35 PM
8	Overflowing storm drains flood our property. The city has done little to manage their water on our property. This storm drain is not prepared for major weather events.	9/13/2016 8:29 PM
9	Drains--so far so good, and I'd like to be able to continue saying that.	9/11/2016 11:47 PM
10	The drains are never cleaned or cleared on our street. We do it ourselves	9/10/2016 3:40 PM
11	The ditches and culverts in front of our house and other houses along Greenwood Ave N should be inspected, it appears some are clogged up so the water may not move south-north.	9/10/2016 9:51 AM
12	I have no idea what if anything you will do. I never heard of you before.	9/9/2016 6:22 PM
13	Drain is not level with road- road needs resurfacing	9/9/2016 4:02 PM
14	The area along the street in front of my property that is county property that I have to maintain is very wet and muddy especially when some one drives on it and makes a large rut which makes it hard for me to mow.	9/9/2016 1:28 PM
15	Concerned about Echo Lake water levels and water quality, particularly since Aurora Corridor project. Seems that it's worse, and not 'as good or better.'	9/9/2016 11:08 AM
16	We have runoff from the QFC shopping center coming through our property. every year when the leaves come down we worry about the neighbor yard being flooded? We have to be vigilant to make certain the leaves are removed to avoid flooding	9/9/2016 11:06 AM
17	Streets are ok but concerned about where it is going. Sensitive areas like echo lake has drainage issues. Not solved - auroras done now. Harmful Vegetation has grown in	9/9/2016 10:58 AM
18	Water draining into echo lake	9/9/2016 10:55 AM
19	Regulations are complete and precise enough to be applied to actual conditions reliably.	9/9/2016 10:54 AM
20	High water table, new structures make increased standing water. Getting worse.	9/8/2016 7:30 PM
21	Storm water being directed thru culver behind the ymca is loaded with oils and sediment from aurora. Their is inadequate filtration and holding tanks for the volume of water entering Echo Lake during a moderate storm.	9/8/2016 1:25 PM
22	This has been a concern since I bought property 35 yrs ago. Everybody passed the problem around. Street always floods, drains slow and we keep leaves etc our	9/8/2016 12:41 AM

2017 Surface Water Master Plan Level of Service Survey - Attachment A

2017 Surface Water Master Plan Level of Services Survey

SurveyMonkey

23	I live on Echo Lake. And there have been times the drain at the north end of the lake gets clogged, the water level rises, and is frightening. Once it got within 18 inches of the door. If it had not been for a volunteer who knew where the drain was and cleared it, we would have had real problems.	9/7/2016 9:50 PM
24	The city right of ways - alleys especially are not being addressed. New construction down hill from our property was put in and they were allowed to raise the alley. Thus, the flow from all the houses upstream from us dumps into our backyard and we have had major damage due to this. After several phone calls and visits to us and our neighbors from the city, no one is responding or taken any responsibility. We will need to spend thousands of dollars to take care of this water that is not coming from our property.	9/7/2016 9:38 PM
25	I am not sure if my culvert has been inspected along with the with pipes that feed it. There also doesn't seem to be a concerted effort to notify homeowners that the stormwater covers/grates should be kept clear of debris.	9/7/2016 7:19 PM
26	When the sidewalk was installed in front of my home, several years ago, it wasn't level and there is a dip where rain water pools. It's gotten worse over time. I reached out to the Shoreline Public Works supervisor continuously, for 2 years. He finally replied, just last month, to say that it wouldn't be repaired (but on one or two occasions over those 2 years, had led me to believe they would).	9/7/2016 6:35 PM
27	I live right n N 185th St. The leaves clog the drains unless someone pulls them out. Street cleaners don't go by often enough. Perhaps the crew in orange jumpsuits can be put to work pulling leaves out of the grates on a regular basis during the Fall & Winter.	9/7/2016 4:44 PM
28	alleys that are considered city R.O.W. but that are not maintained by the city and allow water migration off of and then allows excess water to drain onto properties which causes flooding to residences.	9/7/2016 4:32 PM
29	We live in a slope and our basement has flooded in the past. I want to make sure storm water drains are maintained so the runoff doesn't end up in our basement.	9/7/2016 4:20 PM
30	Water from surrounding properties and from the street flows onto our property, causing flooding of crawl spaces, necessitating a sump pump that runs most of the winter. Each individual property (and the city) should be required to manage their own stormwater and prevent runoff onto surrounding properties.	9/7/2016 4:07 PM
31	drain between homes gets clogged and drain by bus stop backs up	9/7/2016 4:00 PM
32	I often see clogged drains due to leaves, etc. on the arterials in our neighborhood. I'm especially concerned with standing water in front of Meridian Park elementary school. This is a hazard to drivers, students, and other pedestrians.	9/7/2016 3:56 PM
33	Needs more maintenance	9/7/2016 3:47 PM
34	Excess surface rain water runs down Densmore N. near 155th. Small berm seems only a temporary solution.	9/7/2016 3:42 PM
35	Standing water at corner of 183rd Street and Meridian Ave N. Homes that have asphalt covering entire area from property to street causing more run off downhill.	9/7/2016 1:08 PM
36	There is a ditch at the bottom of my property next to the street. I honestly don't know if it's my responsibility or the city's to maintain that area, so I do it - clean up dead leaves and debris. I also clear out debris from the large drainage pipe that runs from the ditch under my driveway. The city never cuts the weeds/grass here, although I see it being done in other areas. So I do it to the best of my ability.	9/7/2016 11:14 AM
37	Drains are plugged which causes rainwater to flood the street. Pollution enters through the open system. Outfalls create erosion of soils.	9/7/2016 11:01 AM
38	My concerns are: - Road construction is impacting stormwater drainage. When the 175th Ave was redone 10/15 years ago, water started backing up in backyards. - Additional development of buildings that will cover more of the soil and end up with more runoff water. The extreme flooding that happen this year in the south of the country happened to places that are not subject to floods but the heavy construction created a dangerous path for water flooding.	9/7/2016 10:18 AM
39	Maintenance and cleaning of storm drain catch basins on private property such as Condominiums and Homeowner Associations.	9/7/2016 10:06 AM
40	My basement was destroyed by flooding. I spent \$30K to repair it and to put in a drainage system. Makes me wonder what the city is doing.	9/7/2016 9:59 AM
41	have never seen any work being done on the ditches and drainage in our area	9/7/2016 9:52 AM
42	My garage at 17327 1st Ave NW is the default drainage for the neighborhood, dependent on one storm drain, which gets clogged with leaves etc. from upper sections of the street.	9/7/2016 9:35 AM
43	Some drains get clogged with leaves and debris. We try to watch out for it, but it tends to happen in the winter, when we are rarely home during daylight hours.	9/7/2016 8:30 AM

2017 Surface Water Master Plan Level of Service Survey - Attachment A

2017 Surface Water Master Plan Level of Services Survey

SurveyMonkey

44	Our ditches are over grown and almost completely filled in. There is no place for the water to go. Neighbors over the years have filled in the ditches for parking.	9/7/2016 8:20 AM
45	-	9/7/2016 8:12 AM
46	That neighbors and homeowners continue to keep street drains clear by their driveways, especially during the fall and winter months.	9/7/2016 7:56 AM
47	Blocked drains, Old or unknown drainage systems on private property diverting water in unexpected ways. High Groundwater flooding basement during wet season.	9/7/2016 7:56 AM
48	Rainwater accumulates in areas where the street has slumped, so it pools instead of flowing to drains.	9/7/2016 7:52 AM
49	Drains are often clogged with tree debris in the Fall. Storm drain locations are inadequate to capture water runoff flowing down streets and into driveways.	9/7/2016 7:51 AM
50	when it rains I have water from my neighbor's back yard I have to have sand bags along fence also installed sump pump in front yard my house is the only one that floods in my cul de sac, my back yard has been sinking in one corner before my house was built this land was a lake full of water then filled to build a house I have contacted seattle water, ronald waste water many times & no response if I sell my house I have to disclose this so I am not happy with city of shoreline	9/7/2016 7:25 AM
51	there is no storm sewer on my block - water won't run uphill to the nearest outlet, so it has to evaporate in the street, and might be making the adjacent ground soft	9/7/2016 7:15 AM
52	My parking strip floods during heavy rains making any visitor parking extremely inconvenient. (I am not familiar with your agency, thus my answers in #7).	9/7/2016 7:12 AM
53	There are spots on Ashworth Ave N where water collects when it rains.	9/7/2016 7:05 AM
54	Surface water structures not connected to the City system in areas where high density residential has been proposed. Steep slopes in areas of high density rezone.	9/7/2016 6:16 AM
55	Flooding in our back yard and in front of our house because neighbors drain into street	9/7/2016 12:09 AM
56	Ever since my road was slurried, water pours down my driveway, overcomes the drain I have and present a real problem of flooding the basement thru a below grade window. The street needs to be leveled so water is channeled into the drain system that is there.	9/6/2016 11:22 PM
57	I really don't think people are aware that the drains need to be kept clear and debris in front of their house will wind up floating down with the rain. Educational letters might help? In the past 2 years there have been more pine needles and plant debris due to the drought conditions and it has caused issues on my block with water flow.	9/6/2016 10:27 PM
58	Open ditches can fill and overflow. Shrubs growing in open ditches, plants/shrubs/weeds/ivy/trees drink water but also impede flow of water.	9/6/2016 6:49 PM
59	There are a series of ditches along 5th NE that need work and maintenance as well as the runoff from the road that runs in front of my house. I think the project along Ashworth should be modeled for this street. The ditches fill with debris and garbage and that gets washed into the drainage system. I also think more could be done to enlist residents to help make sure street drains are clear to receive runoff.	9/6/2016 6:10 PM
60	Our condo area is flooded by properties north of here.	9/6/2016 4:32 PM
61	Surface water management in Innis Arden and much of Richmond Beach is non-existent or inadequate with roadside flooding or water coursing down and/or across roadsides in many areas during significant rains. Some areas have no ditches or catch basins and many catch basins are at an elevation above the pavement so that water does not flow into them, creating huge puddles or channeling the run-off into other areas. Shoreline has authorized massive tree-cutting of significant trees without requiring planning and mitigation for the additional run-off generated as a result of tree removal.	9/6/2016 4:24 PM
62	Primarily centered around drain at NW corner of 178th and Wayne. Heavy rainfall or during winter it doesn't drain so water accumulates. I have gone out with a rake to clear it when the puddle forms.	9/6/2016 4:07 PM
63	Current infrastructure doesn't seem to be capable of handling existing runoff. The recent rezone will only make matters worse. Also jurisdiction is an issue. The Shoreline community Center storm drains aren't under the managing entity.	9/6/2016 3:27 PM
64	Neighbors mow lawn, blows into the street...then the rain takes it into the storm drains and plugs them.....chemicals in lawns etc.	9/6/2016 3:15 PM
65	Surface drains need to be cleared of clougs	9/6/2016 3:00 PM
66	The infrastructure is a problem throughout America. Fortunately, Shoreline's sewer is newer than most. RE: the next set of questions - how would I know?	9/6/2016 2:42 PM

2017 Surface Water Master Plan Level of Services Survey

2017 Surface Water Master Plan Level of Service Survey - Attachment A
SurveyMonkey

67	Ditches in our neighborhood, not tied in to storm water sewers	9/6/2016 2:40 PM
68	Boeing Creek washed out banks and trails is concerning. Also not excited about the plan to breach Lost Lake dam but understand the prohibited costs of dredge. Wish there was a cost effective way to keep the lake without the need to dredge.	9/6/2016 1:32 PM
69	We had a mainline burst in front of our property.	9/6/2016 12:53 PM
70	There are too many 'ditches' which do not allow people to walk without going into the street and traffic. The city should address this.	9/6/2016 12:42 PM
71	Failing culverts under private driveways, ditch maintenance, inventory of drainage pipes not correct or classified properly.	9/6/2016 12:41 PM
72	They hardly seem to be maintained at all. When something was done the result was so bad the neighbors filled the ditch back it.	9/6/2016 11:58 AM
73	Some drains have been built higher than the street and are useless. An example of this is on the corner of Richmond Beach Road and 3rd NW. There are also drains placed within 2 feet of each other--total waste. There are many open ditches in our neighborhood that do not flow with water, even during heavy rainstorms. These should be filled in and covered with sidewalks to make walking along streets more safe.	9/6/2016 11:48 AM
74	I hae concerns of flood events and it's impact on water quality on Echo Lake. I also have concerns on maintainenanc of open ditches along streetsides..as they become deposits for litter and invasive weeds.	9/6/2016 11:42 AM
75	When the lake is high and the rain is falling hard and fast our yard starts to flood and comes closer and closer to my patio	9/6/2016 11:37 AM
76	Clear the ditches and drains	9/6/2016 11:37 AM
77	As a pedestrian I often notice pools of water on the side streets that do not drain - an example is on 183rd and Meridian. When there is a lot of rain or a downpour this can be a safety issue having so much water in the street or path.	9/6/2016 11:34 AM
78	The ditches are dangerous for people and cars. They become a litter bin - and cannot be casually cleaned. The grass grows so high that in some places you cannot see over it, or you cannot see there is a ditch there. The Echo Lake exit is not well maintained. It gets clogged with debris - a neighbor used to maintain it in storms but he has moved.	9/5/2016 11:23 PM

Q7 How satisfied are you with the following aspects of our stormwater services?

Answered: 127 Skipped: 44

	Dissatisfied	Somewhat dissatisfied	Neutral	Somewhat satisfied	Satisfied	Total
Speed of service	9.45% 12	5.51% 7	66.14% 84	5.51% 7	13.39% 17	127

Q9 Do you have any additional stormwater service concerns or suggestions?

Answered: 53 Skipped: 118

#	Responses	Date
1	Thanks for asking.	9/14/2016 11:07 PM
2	A storm water outlet near the NE corner of the Dale Turner YMCA is about 4 to 5 feet across and during heavy rain discharges over 1 million gallons of water within a 24 hr. period several times a year which goes into Echo Lake. How can this possibly be filtered properly before it enters the lake? My calculations made from data taken from King Co records.	9/13/2016 3:37 PM
3	this is the first time I heard of Surface Water Utility	9/11/2016 11:47 PM
4	It would be great to have community education on residential and commercial pollutants, so people are using environmentally friendly or no chemicals on their lawns, gardens, and rooftops.	9/10/2016 9:51 AM
5	No. This is all new to me.	9/9/2016 6:22 PM
6	Not at this time.	9/9/2016 4:13 PM
7	I am concerned that the report on the Lake quality will take too long.	9/9/2016 11:08 AM
8	Put cisterns at the QFC Rite Aid parking lots to end the water coming through my private property.	9/9/2016 11:06 AM
9	Concerns about echo lake. Encourage ymca to help	9/9/2016 10:58 AM
10	Concerned goals and regulations will be ignored by developers and no effective action will be taken.	9/9/2016 10:54 AM
11	New buildings need to address their impact and not make it worse.	9/8/2016 7:30 PM
12	Pump the culver behind the ymca 4x a year of sludge, street sweep aurora at night to cut oils and heavy metals. Cut the invasive weeds at the s end of Echo lake and get rid of the drug users living in the bushes and replant with native plants and make a bird sanctuary. Re due the ditch between Echo Lake and the culver; it is loaded with sluge.	9/8/2016 1:25 PM
13	In general I'm concerned about the water quality of Echo Lake, but am unsure of the root cause of deteriorating water quality.	9/8/2016 12:59 PM
14	Fix the flooding problem on our streets 167th and Linden	9/8/2016 12:41 AM
15	I don't really know much about it; sorry. I do appreciate the concern about wetlands.	9/7/2016 9:50 PM
16	Please contact me with a solution for the major water run off from the alley that lands on my property in Richmond Beach. Thank you, Diane Schultz 206-542-4928	9/7/2016 9:38 PM
17	As a homeowner, perhaps a "homeowners stormwater guide" with helpful tips and basic steps showing what we all can all be doing also to improve storm water quality on our properties.	9/7/2016 8:10 PM
18	No	9/7/2016 7:19 PM
19	Since I'm not sure what the Surface Water team provides, I couldn't answer #7. If they are the Public Works group, my answers would be "dissatisfied".	9/7/2016 6:35 PM
20	Several neighbors on my street spent a good amount of time discussing water issues that have been problematic for MANY years with a gentleman from the city (I would have to research on another computer to find the email communications and I will when necessary). I was actually shocked at how fast they came by to check it out and just as fast to discuss what could be done. Well, that was a couple of years ago and have not heard a word since. I would be happy to get into more details. gruwelfam@comcast.net	9/7/2016 4:53 PM
21	The zoning to allow more buildings along N 185th St. area & bring in a larger population is absolutely insane. We have standing water, underground streams, swampy yards and yet the City Council thinks it's a great idea to build, build, build. More people = more waste water & pollution. Stop the growth. If we wanted to live in the "city" we'd be in downtown Seattle among all the concrete!	9/7/2016 4:44 PM
22	Keep up the good work!	9/7/2016 2:31 PM
23	What are the bright green areas inside the different neighborhoods.	9/7/2016 1:43 PM

24	All of us are remiss in not making the natural environment a top priority. But ultimately, accomodating nature's ways is a critical goal.	9/7/2016 11:44 AM
25	Proposed construction of townhouses at 18339 Wallingford Ave N will increase flooding of homes just south of that address (including our home!).	9/7/2016 11:01 AM
26	too expensive, city regularly doesn't protect wetlands	9/7/2016 8:12 AM
27	Any power generation possibilities? Turbine at outfall?	9/7/2016 7:56 AM
28	Needs better outreach with public.	9/7/2016 7:56 AM
29	Storm water flowing down hills is not captured by drains and diverts down our driveway, causing pooling of water in front of our garage and occasional flooding into our garage.	9/7/2016 7:51 AM
30	answer my questions that I addressed in survey	9/7/2016 7:25 AM
31	This survey doesn't really address actual concerns of me as a resident, but asks me to rate an agency I know little about, since Shoreline's "customer svc" rep I dealt with goes out of his way to disappoint and find excuses for not providing service for my neighborhood.	9/7/2016 7:15 AM
32	Would love to see sidewalks, curbs, and proper drains on Ashworth!	9/7/2016 7:05 AM
33	I have seen hard working Shoreline employees clearing drains! Keep up the great work!	9/7/2016 6:35 AM
34	City needs to work with private residents to get a better understanding of where the system is broken or absent. Complete assessment of each lot in any up zone areas with moratorium on any permits until this is done.	9/7/2016 6:16 AM
35	See the above pertaining to Greenwood PI N	9/6/2016 11:22 PM
36	I do and am currently in contact with Shoreline Public Works department regarding the issues on 26th Ave. I believe home to home education on prevention and possibly additional drain(s) would help the issues my neighbors and I have been experiencing. Please note that my answers for # 7 are neutral, as I am not familiar yet with the storm water services, but would like and now plan to be. Thank you for asking! :)	9/6/2016 10:27 PM
37	Cover or enclose ditches to prevent overflow. Upgrade to larger stormwater runoff pipes. With all of the new construction in our area, there is more cement, fewer trees and shrubs to absorb the water so the entire system needs to be enlarged to handle the increased flow that does not absorb into the ground. Water retention and detention systems in new developments should be a requirement and the developers should pay for them as well as for upgrades to the surrounding communities/neighbors/and down stream stormwater systems.	9/6/2016 6:49 PM
38	Question 7 is difficult to answer as I have had no personal experience or interaction with the stormwater services. Question 8 is problematic in that some of the responses rank equally and are not necessarily more important than the other. I would rank them all fairly high and would assume that they go hand in hand.	9/6/2016 6:10 PM
39	No	9/6/2016 3:27 PM
40	Have neighborhoods take responsibility for their storm drains	9/6/2016 3:00 PM
41	My heavens, you have gone too far with questions 7 & 8.	9/6/2016 2:42 PM
42	No	9/6/2016 2:40 PM
43	Bury all the open ditches and cover drain pipes with sidewalks.	9/6/2016 1:32 PM
44	How does under ground water effect storm water especially with new construction digging foundation walls that block under ground water paths. Is this what is creating the water table to rise?	9/6/2016 12:47 PM
45	If there is an issue on my street again I will never talk to city about it in fear that crews will come and destroy property while making things worse.	9/6/2016 11:58 AM
46	Someone should survey drainage ditches during rainstorms. If the ditch is not in use (i.e., no water flowing through it) then the ditch should be covered for pedestrian safety.	9/6/2016 11:48 AM
47	Not the biggest issues the city faces. drug use, homeless, crime are much more of a concern than a little water a few times of the year. If folks get off their ass and clean up the drains and such already in place, much of this can be eliminated.	9/6/2016 11:38 AM
48	Don't raise property taxes to cover more city expenses. You're impacting property owners in Shoreline. Please keep it affordable to live and work here.	9/6/2016 11:38 AM
49	plans for lowering lake levels when necessary	9/6/2016 11:37 AM
50	Stay within the budget, and keep the drains clear.	9/6/2016 11:37 AM

51	Don't make all of your survey questions required. As someone who is new to Shoreline, I cannot accurately answer #6 yet. When you make every survey question required, you get more bad data.	9/6/2016 11:34 AM
52	A huge concern is the cost for infrastructure in Shoreline.	9/6/2016 11:34 AM
53	We need to be responsible for areas downstream from us - Lake Forest Park and North Seattle and not contribute to their surface water problems.	9/5/2016 11:23 PM
