

## **SAC MEETING #6 BREAK OUT GROUP QUESTIONS**

January 25, 2018

1. Current Sidewalks
  - Do the applied prioritization criteria scoring results of existing sidewalks match what you would expect to see (i.e. does the highest priorities point to area of most use and need?)
2. Sidewalk Survey Results
  - Does the comparison of the survey results by frequency of comments vs. applied prioritization criteria scoring help demonstrate the case for criteria-based vs. complaint-based ranking?
  - How would you message this at Open House #2?
3. Sample Scorecards
  - Do you have suggested adjustments to the prioritization metrics and/or point allocations?
  - Does the results of the sample high, medium, and low sample scorecards match what you would expect to see?
4. Miscellaneous – Please share any other comments, edits, etc.
