

2018 Surface Water Small Project

Near 2112 NW 199th St (Work Order #3363)
Stormwater Pipe Replacement

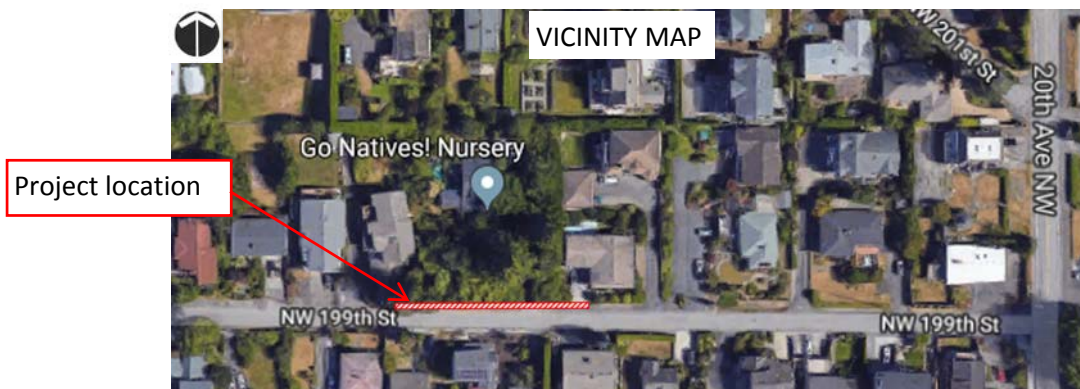

Drainage improvements are coming to your street!

This project will replace a damaged stormwater pipe on the north shoulder of NW 199th Street.

Project Improvements:

There is an existing shallow pipe that is exposed and damaged along the north shoulder of NW 199th Street. This project will replace approximately 125 feet of stormwater pipe in the north shoulder, near the property at 2112 NW 199th Street. The shoulder area on top of the new pipe will be restored with new asphalt pavement to better protect the shallow pipe below.

The conceptual sketch below shows the proposed work on NW 199th Street (looking west):

2018 Surface Water Small Project

Near 2112 NW 199th St (Work Order #3363)
Stormwater Pipe Replacement

During Construction:

Peak construction activities should be limited to just a few days. The overall duration of construction activities may be spread out over a few weeks. Temporary construction impacts may include but are not limited to:

- Short-term unavailability of some on-street parking within or near the work area.
- Temporary loss of two-way travel on NW 199th Street during active construction.
 - Local access will be maintained at all times; travel lane impacts will be limited to between 7am and 6pm on weekdays. The duration of such impacts is not expected to be more than a few days.
- Temporary loss of driveway access (only for driveways within or near the work area). Residents will be notified in advance of any construction activity blocking a driveway. We will work with residents to minimize disruptions from driveway access issues.
- Vegetation within the right-of-way may be trimmed for construction access.
- Disturbances to landscaping, signage, and paving within the right-of-way

Following Construction:

- You should notice improved shoulder condition on the north side of NW 199th Street.
- General condition of construction site will be clean and restored to match pre-construction conditions, or better.
- Asphalt pavement will be neatly patched, as needed.
- Any disturbed landscaped areas will be restored. Areas seeded for grass may not grow until later in the fall. Interim measures to prevent erosion and soil loss may be installed.

The City will respond to any questions, complaints, requests, or concerns as soon as possible.

Construction is scheduled for mid- to late-summer 2018; notice will be sent to confirm dates once known. Project website (listed below) will be updated as the project advances.

NOW is the time to ask questions or provide comments regarding this work.

Please reference Work Order #3363.
