6. Right of way vacation # 8a
7. The green space that exists now on the right of way has been managed and maintained by the community and the city together for many years.
Here are the issues;
1) do not make it a Native Growth Protection Easement because it's way to complicated to manage over time. You have a private owners land requiring city management - permits needed to do anything including prune, remove invasive and plant etc

We Saw the details of how maintenance works in the NGPE But only after we had initially thought it was a good idea. It is NoT the solution!!!!
It's a bad set up for everyone.

2)IF the existing view easement does not apply to this right of way do not approve vacation of it!

The idea was the view easement was a benefit to the community for the long term.

The view from 22nd NW is critical to the community.. all those high school graduation photos taken there and many bikes and walkers taking photos to enjoy the view .
8. (o) Oppose

Thank you,
City of Shoreline
