Sunflowers will thrive anyway here, but they sure are loving this weather! It's what they are built for.

Is this photo sideways or are the flowerheads just too heavy for their stalks?

Cynthia Knox is an artist, a neighborhood leader, and the creator and organizer of the SummerSet Arts Festival which ran

By Cynthia Knox

This Monday, at July 30th's Shoreline Council Meeting there is an agenda item regarding tree retention policy for developers and developer's wishes/demands.

Trees are being cut down at a rapid rate all over Shoreline and the current replacement policies/fines are insufficient to keep

Do not be fooled by the statistic quoted by city staff regarding what seems like a small impact on the tree canopy with the cur

Every amendment that allows loopholes for trees to be decimated is a downhill slide to making our city look and feel more lil

City Council Members, I ask you to consider the following when representing RESIDENTS of Shoreline.

1. That building density with lack of trees (if builders get to buy their way out of saving trees), will lead to creating HEAT ISLANDS.
2. The Planning Commission is populated with people in professions that are tangential to, and profit from developers - they are not representing the residents.
3. Shoreline does not have to bend over backwards to entice developers to do business here. We are the next city up from Seattle. How do we do this in practice as well?
4. Would the fees paid for each tree (for fee-in-lieu) be commensurate with what a tree is really worth? My guess is that the price is less than the value it provides to humans and animals - not how much one can purchase one for at a nursery. Clean air is priceless for people like us.
5. As a way of mitigating the problem of heat islands and lack of air purification from lack of trees/plants, I request that ordinance be passed requiring trees in architectural plans, and large fines for building owners who do not comply . Now is our chance to keep Shoreline green. If we don't act now, we will regret it later.
6. The notion of "affordable" housing in Shoreline is a joke. Many college graduates are making \$15 an hour which makes paying rent in Shoreline is no way either non-educated or educated people can get ahead in this housing market. If developers are selling the Council on the idea of affordable housing at the Transit Center, please do your research as to how true that actually is? Perhaps the City can give developers other environmental incentives.
7. Our air and the health of our underground natural infrastructure (soil, roots, fungi, ground water/streams, etc.) is dependent on trees and plants.

Shoreline Council and City Staff, thanks for considering. You are our representatives. Please act in our interests.

[WeatherWatcher: 9th Anniversary of the Lake Ballinger Edmount Island Fire](#)

Posted: 29 Jul 2018 11:45 PM PDT

On this day in weather history, July 29, 2009, we had an all time record high temperature of 103.4°F, measured at Sea-Tac and a fire.

The island is a peat bog -- difficult to control fires on -- especially when the peat catches on fire. Fire fighters had to set up flood

Two years later I photographed the island to show how much of the vegetation was lost to the wildfire. We also did a report o

For the 9th Anniversary I decided to go take a new photo of the island to compare to see how much it has recovered from this

Notice how in each photo, the sky is this brownish grey color? Most summers by this time show the evidence of wildfire seasons.

As we cool down later Tuesday and Wednesday the marine air flow should help clear out this wildfire smoke in the Puget Sound area.
