

**2017 Docket Comprehensive Plan Amendment #5
Amendment to the Transportation Master Plan Master Street Plan**

Transportation Master Plan, Appendix D: Master Street Plan, p. 253, 5th paragraph, 2nd bullet:

The amenity zone should be developed in a manner that is appropriate and complementary to the adjacent land uses and use of the street. The minimum width for amenity zones is five feet. Amenity zones should generally be landscaped and, where possible, utilized for stormwater management purposes. Amenity zones adjacent to roadways that do not have off-street parking shall be landscaped as much as possible. In areas where a wide pedestrian walking surface is desired, such as commercial areas, the amenity zone may be a hard surface treatment with trees in pits. Amenity zones that are adjacent to on-street parking areas should be landscaped as much as possible but may include limited hard surface areas for drivers or passengers existing vehicles. Amenity zones that are along bridges do not need to include landscaping, but can include streetscape amenities such as hard surface design treatments, light poles, and/or signage.
