

Project overview

The City of Shoreline and Shoreline Community College are working together to improve safety and mobility at the intersection of Greenwood Avenue N with N 160th Street and NW Innis Arden Way.

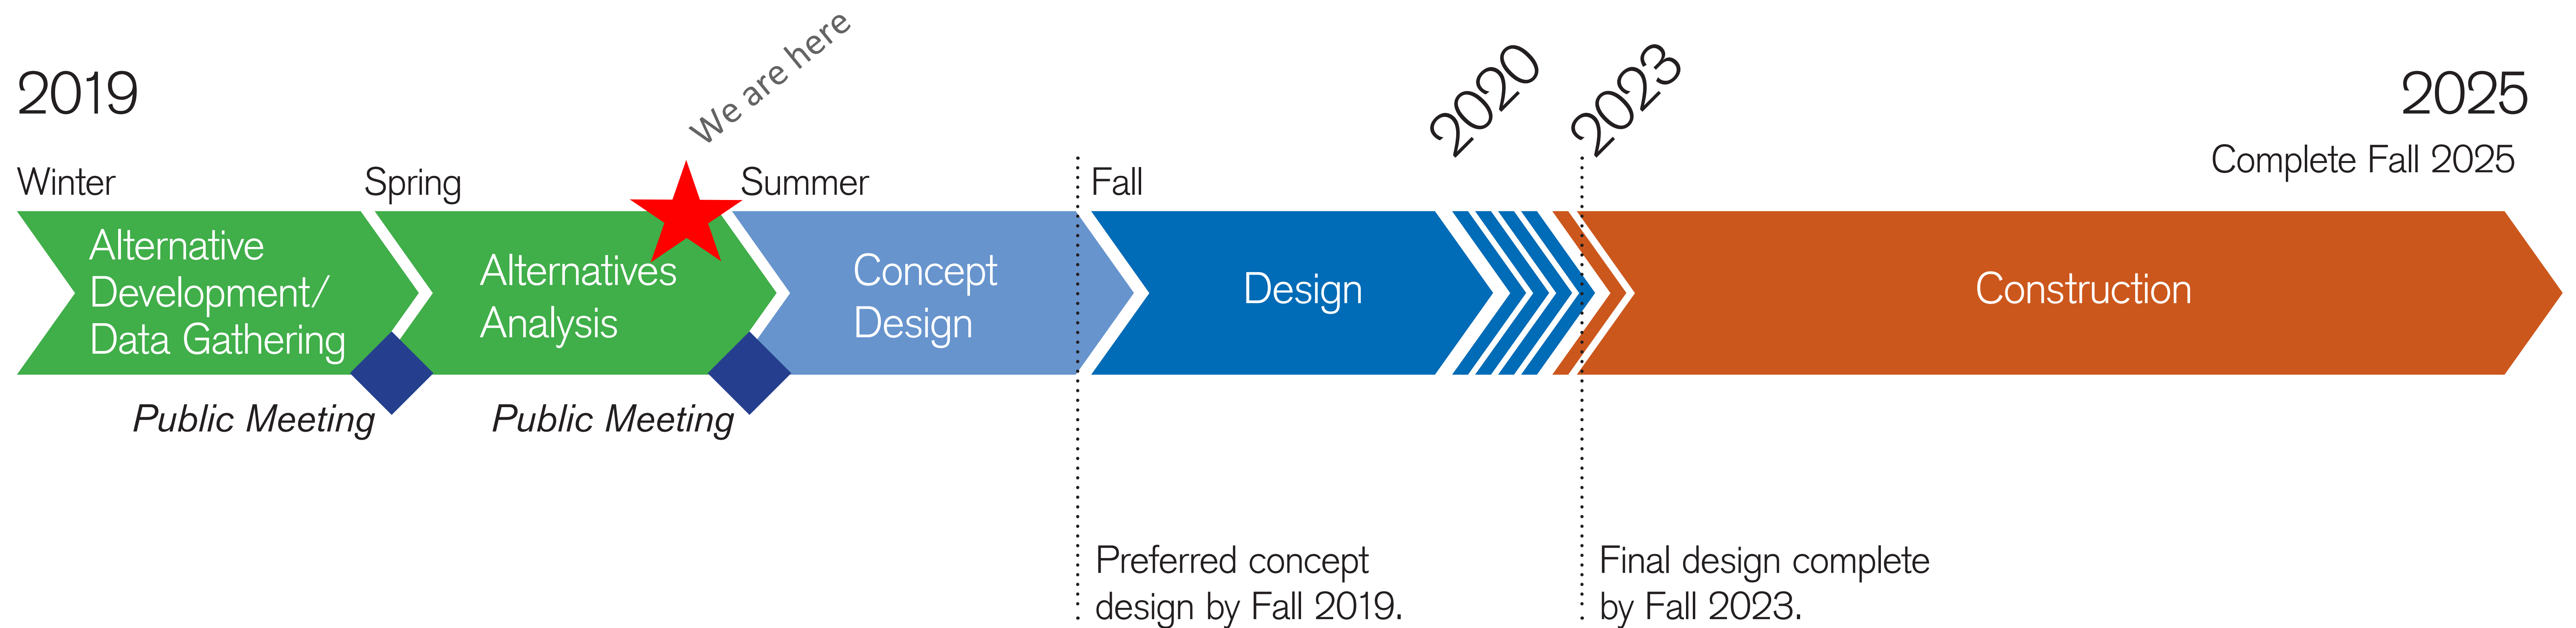

Two concepts are being considered: one option is a roundabout and one option is a signalized intersection.

At tonight's open house you can **learn more** about the conceptual options and **provide input** to help inform the preferred concept design.

Project timeline

The College's Master Development Plan projects cause impacts to this intersection that must be mitigated to meet City codes. Intersection improvements must be completed within 6 years of the opening of the residence halls project.

The College will fund all or a large portion of the improvements that result from this alternatives analysis. Depending on the option selected, the City or College will construct the project by Fall 2025.
