

SKIP THE STRAW

OCEAN CONSERVANCY | CITY OF SHORELINE

Millions of plastic straws pollute our waterways and ocean, harming marine animals, such as endangered sea turtles, that ingest an alarming amount of plastics. Each year, cleanup volunteers collect hundreds of thousands of plastic straws and stirrers, which continue to make the top ten list of most collected items worldwide.

HELP US STOP OCEAN TRASH AT THE SOURCE

This business has taken action to reduce ocean pollution by “skipping” plastic straws. Servers will not automatically put a straw in your beverage but can provide one upon request.
