7. Regarding 3/23/20 Agenda items 9b and 9c of Resol. 449, I recommend and urge Council Members to support King County Cities Collaboration (K4C) Joint Climate Commitments because Shoreline City's citizens believe our existing tall tree canopy play a critical role in mitigating and reducing greenhouse gas emissions. Groups dedicated to the protection and preservation of our tall trees believe the trees' contributions to our health, our environment and our welfare are worthy of respect, value and stewardship. To ensure that the tall trees are part of "sustainable environment" definition, please include specific language about protecting Shoreline's tall conifer trees in both public and private lands. Furthermore, recognizing the contributions of our tall conifer trees on such lands should be incorporated in Shoreline's permitting requirements so anyone contemplating a development, an expansion or redevelopment will accommodate for them.
8. (o) Support

Thank you,  
**City of Shoreline**
