

# Construction Coming Soon

## 2020 CIPP Stormwater Pipe Repair Project

The City of Shoreline is beginning stormwater pipe repair construction soon at multiple locations throughout the City. **You have been sent this postcard because you live near a location where construction activities will occur.** The installation of composite liners to repair failed pipes will not require major disturbances but may cause brief inconveniences.

Residents near a project work site should expect:

- Construction work over multiple days, limited to Monday-Friday between 7am and 6pm.
- Traffic adjacent to the work area may include lane shifts, reductions or closures with flaggers.
- Access to nearby houses will be maintained.
- Temporary loss of on-street parking may occur adjacent to work areas on construction days.
- Brief periods of noise and/or odor (like plastic or glue) associated with pipe lining activities.

**Intermittent construction activities are currently scheduled to occur August thru October.**

**For more information about specific project sites and schedule updates, see the project website:**
