Dear Mayor Hall and Shoreline City Council,

We have felt the impacts of climate change this summer here in Washington. We know more aggressive action is required, and we know our local leaders have a critical role to play.

Washington Conservation Voters strongly supports the City of Shoreline's consideration of a prohibition on fossil fuels in new construction. We have even included this action as part of our [Evergreen Future](#) campaign, a roadmap for how we can tackle our biggest health and environmental challenges here in Washington.

Buildings are the fastest growing source of climate pollution in the state. We must stop investing in fossil fuel infrastructure we know cannot support a healthy, vibrant future for our communities. And we must do so while providing a just transition for the most vulnerable communities and workers.

Thank you for your consideration. We look forward to supporting the City of Shoreline as it continues to lead on climate action.

Best,  
Danielle
