

2022 Stormwater Pipe Repair & Small Drainage Projects

WO 6810 – Near 19359 1st Ave NW & 19509 1st Ave NW

Small Drainage Projects

Drainage improvements are coming to your street!

Project Improvements:

This project will correct small drainage issues at multiple locations throughout the City. Construction activities may include any or all of the following, as needed to complete repairs: Pavement removal, excavation, pipe and catch basin installation, pavement repair and temporary traffic control.

The conceptual sketch below shows the proposed work areas near 19359 1st Ave NW.

Small Drainage Projects

During Construction:

Peak construction activities should be limited to just a few days. The overall duration of construction activities may be spread out over a few weeks. Temporary construction impacts may include but are not limited to:

- Short-term unavailability of some on-street parking within or near the work area.
- Temporary loss of two-way travel during active construction.
 - Local access will be maintained at all times; travel lane impacts will be limited to between 7am and 6pm on weekdays. The duration of such impacts is not expected to be more than a few days.
- Temporary loss of driveway access (only for driveways within or near the work area). Residents will be notified in advance of any construction activity blocking a driveway. We will work with residents to minimize disruptions from driveway access issues.
- Disturbances to landscaping, signage, and paving within the right-of-way.

Following Construction:

- You should notice improved drainage.
- General condition of construction site will be clean and restored to match pre-construction conditions, or better.
- Asphalt pavement and concrete curb and sidewalk will be neatly patched, as needed.
- Landscaped areas will be restored. Areas seeded for grass may not grow until later in the fall. Interim measures to prevent erosion and soil loss may be installed.

The City will respond to any questions, complaints, requests, or concerns as soon as possible.

Construction is scheduled for mid- to late-summer 2022; notice will be sent to confirm dates once known. Project website (listed below) will be updated as the project advances.

NOW is the time to ask questions or provide comments regarding this work.
Please reference Work Order 7079.
